Michael Allison;

Loper, Gretchen;

To follow up from our phone conversation during our 4th grade meeting and to include Mrs. Loper I have typed the following notes:

The fourth grade team would like a cart of thirty chromebooks to use as a grade level.

Ms. Kawa and Mr. Allison requested two desktop computers for their classrooms to aide in research, math work, and Accelerated Reader/Math.

Ms. Kawa and Mr. Allison requested access to Google Docs. They are aware that you will reset their password and let them know via email.

Thanks for all you do!

The Fourth Grade Team

We would like to continue our implementation of Chromebooks for grades 3-12 by taking care of the 4<sup>th</sup> grade classrooms. We can do this one of two ways.

1. We can provide you with a single cart of chromebooks large enough for your entire class to use one in a 1:1 environment (when you reserve it).
2. We can provide individual chromebooks to each classroom to be charged and managed individually by each teacher. There would be 3-4 per classroom.

Once you have discussed the pros and cons of each option and decided as a group on how you would like to use them I will get them ordered and out to you. I am happy to discuss these options with you if you want me to come and speak with your group.

Thanks- Doug
